Generated Test Cases

8 test case(s) generated • Model: openai/gpt-oss-120b • Tokens: 2146

Test Case ID	Title	Category	Expected Result
▶ TC-001	Create item with valid data	Positive	Item is created successfully and a success message "Item created successfully" is displayed.
▶ TC-002	Create item with missing required field	Negative	Validation error is shown for the Name field and the item is not created.
▶ TC-003	Create item with maximum length strings	Edge	Item is created successfully without truncation and a success message is displayed.
▶ TC-004	Create item with invalid characters	Negative	Validation error is displayed indicating invalid characters and the item is not created.
▶ TC-005	Attempt to create item without proper role	Authorization	User is redirected to an access denied page or shown an "Insufficient permissions" message.
▶ TC-006	Performance: Create item response time under 2 seconds	Non-Functional	The item is created and the success message appears within 2 seconds.
▶ TC-007	Create item with duplicate identifier	Negative	Error message "Identifier already exists" is displayed and the second item is not created.
▶ TC-008	Create item with whitespace-only fields	Edge	Validation errors are shown for Name and Description fields indicating that whitespace-only input is not allowed.
